

State Hazard Mitigation Advisory Committee Minuets of April 14, 2004 Teleconference

The teleconference began with Scott Simmons asking everyone to introduce themselves as they joined the teleconference. When the majority had signed Taunnie conducted a role call.

Scott reviewed the State Hazard Mitigation Plan web page and discussed the following items:

- 409 Plan
- Name change SHMPAC to SHMAC
- Status of the 322 Plan
- Timeline for completion
- Capability Assessment Questionnaire
- Integration of Local / Agency Data

The teleconference goals were two fold; first to bring everyone to a common understanding of where we have been with the 409 plan. This included where we need to go to further develop the 409 plan into the DMA 2000 Section 322 criteria. Second, all agencies need to complete the Capability Assessment Questionnaire by April 30, 2004. Taunnie identified the agencies with completed assessments.

Pamela Bergmann asked if Federal Agencies need to complete the assessment since this seemed to be a State requirement. The recommendation was to have all partners fill out the assessment for continuity since all agencies are responsible for infrastructure under there responsibility. Each agency has responsibility for planning and response of a disaster.

One of the participants requested addition of links to our web page of additional Local Plans from other state's communities.

Scott explained that we would not integrate individual "Local Plan" data directly into the State Hazard Mitigation Plan but we would state in the plan that "information gleaned from Local Plans was used for the State's strategy." He asked if there were any suggestions or comments concerning this approach. Receiving none, he stated that we will be integrating Local Plans as stated above and place the actual Local Plans as an appendix of the plan.
